The Emergency Housing Special Needs Grant (EH SNG) is available to people who cannot remain in their usual place of residence, if any, and do not have access to other accommodation which is adequate for them or their family's needs. The Ministry pays EH SNGs directly to the accommodation supplier, and assistance is generally granted for up to seven nights.

After these seven nights, Work and Income arrange another appointment with the client to discuss their housing situation and assess whether another grant is required. The Ministry works hard to support people in emergency housing to secure a long-term housing solution, either through public housing or private rental accommodation. Other options including, transitional housing, can also be explored as an option depending on availability and the individual's circumstances.

The Ministry recognises that motels are not a long-term solution or the solution that we want to deliver for people who are potentially in a vulnerable situation. Emergency housing provides a short-term solution while more sustainable options are progressed. More information about EH SNGs is available at the following link: [www.workandincome.govt.nz/housing/nowhere-to-stay/emergency-housing.html](http://www.workandincome.govt.nz/housing/nowhere-to-stay/emergency-housing.html).

Some people may struggle to access suitable housing due to a lack of available supply or they simply may not be able to meet the high cost of housing which may result in them receiving EH SNG support for an extended period of time.

The year 2020 saw a significant increase in demand for emergency housing, as the Ministry supported people through the COVID-19 pandemic period with accommodation where they could safely self-isolate. Due to the COVID-19 lockdown restrictions, people also could not easily move out of emergency housing into long-term accommodation, which contributed to longer durations of stay and higher costs.

For the sake of clarity, the Ministry has separated the data into four separate tables, with each table in an individual tab.

Please find **APPENDIX ONE**, which contains **Table One** which shows the number of clients aged 16-24 who received an EHSNG while in receipt of a selected benefit, for the period 1 January 2019 to 31 December 2022, broken down by year, region, age and Benefit.

**APPENDIX TWO**, which contains **Table Two** which shows the number of clients aged 16-24 who received an EHSNG while in receipt of a selected benefit, for the period 1 January 2019 to 31 December 2022, broken down by year, region, age and ethnicity.

**APPENDIX THREE**, which contains **Table Three** which shows the number of clients aged 16-24 who received an EHSNG while in receipt of a selected benefit, for the period 1 January 2019 to 31 December 2022, broken down by year, region, age and gender.

**APPENDIX FOUR**, which contains **Table Four** which shows the average consecutive weeks stayed in Emergency Housing for clients aged 16-24 receiving a selected benefit, for the period 1 January 2019 to 31 December 2022, broken down by year, region, age and benefit.

To protect confidentiality, the Ministry uses processes to make it difficult to identify an individual person or entity from published data. These data tables have had random rounding where values have been randomly rounded to the nearest multiple of 3. This is applied to all cell counts in the table. The impact of applying random rounding is that columns and rows may not add exactly to the given column or row totals. The published counts will never differ by more than two counts.

Cells with 'S' are those where data has been suppressed to protect identification of individuals and is applied to values less than 6.

Regarding the tables provided, please note that the Territorial Local Authority (TLA)s which make up each region, is estimated based on the clients' address at the time of the grant. These TLA's may not be the same as the address of the emergency housing supplier. Where the client address is not recorded, the location of the Ministry's service centre case managing the client has been used to approximate which TLA a client resides in. However, as the Ministry has switched to working from national queues, EH SNGs and other hardship grants could be granted by a Case Manager working anywhere in New Zealand. Therefore, in such cases, the TLA may not reflect the actual client address or location. Due to the transient nature of people receiving EH SNGs, the recorded address for a client may also be that of a trusted family member or friend who receives mail on their behalf.

From December 2021, we have changed our ethnicity reporting to an approach called 'total response'. Making this change means we recognise all aspects of someone's ethnicity. This change reflects our clients more accurately, aligns our approach with Statistics NZ's reporting and reflects best practice. Ethnicity is about people's identity and sense of belonging. Ethnicity measures cultural affiliation, rather than race, ancestry, nationality, or citizenship. Ethnicity is self-perceived, and people can identify with more than one ethnic group. Previously, we reported ethnicity using an approach called 'prioritised ethnicity'. 'Prioritised ethnicity' means that we allocate people to a single ethnic group in an order of priority. The priority used by MSD previously was Māori, Pacific Peoples, Other and NZ European.

For more information about 'total response' for ethnicity reporting, please see: [www.msd.govt.nz/about-msd-and-our-work/tools/how-we-report-ethnicity.html](http://www.msd.govt.nz/about-msd-and-our-work/tools/how-we-report-ethnicity.html).
